Seven Valleys Design/Build Inc.

Article by Seven Valleys Design/Build Inc.

Issue Date: (Mon) October 6, 2008

Seven Valleys Design/Build Inc. is a full-service design and construction company that takes an owner's concepts and ideas all the way to the finishing touches at the completion of construction.

Designs for kitchens and baths, construction drawings, additions, finish-material supply, plan review, permit processing and construction are all done in-house, which controls costs and keeps the project moving forward. The company also works closely with architects and engineers when the owner's project requires it.

Chuck Siebenthal, CKD, owner of the company, brings his 34 years of experience in the construction industry to every project. His construction experience includes concrete to painting, dozens of new home designs, construction drawings and hundreds of kitchen and bath installations. His employees and skilled subcontractors bring another 100-plus years of expertise to every project they do. Seven Valleys Construction has used a budget/design program for many years that has worked well for its clients.

The company wants homeowners to be involved in the design process. In today's world, with increasing material and labor costs, the entire team does planning as far in advance as possible to avoid delays. The team uses easy-to-understand contracts and homeowners are kept informed during the entire process.
